Agency Vision

Our vision is to be the information technology leader for Arizona government, providing innovative and transformative services. This won't happen overnight. And it won't happen in a vacuum. Working together toward this shared goal, we will succeed.

Agency Mission

Inspired by that vision, our mission is to deliver forward-thinking and secure IT solutions to state agencies. We will achieve this by:

• Putting the customer first

• Offering world-class services

• Focusing on value, not cost

Agency Platform Distribution - Drupal 9 Core Upgrade Initiative

State of Arizona – Arizona Department of Administration

March 17, 2021

Initiative Overview

Current Platform:
- The purpose of the Agency Platform, as a whole, is the ability to deliver a streamlined, secure, and well developed website at a low cost for state agencies.
- Currently the Platform hosts and maintains over 185 websites for 80 State Agencies.

Problem Statement:
- Current platform will reach its end of life in November of 2022.
- Lacks flexibility, modern design, and usability.
- Current platform contains a lot of unused features and software code still needs to be maintained at our expense.
- Cross-vendor support lacks documentation, consistency, and collaboration.

Benefit of the Initiative:
- New platform will deliver a better end user experience for site visitors, content creators and administrators
- Provide the most up to date technology and security for web builders to leverage
- Modern design and user experience
- Better documentation for content creators, vendors, and site builders
- More structured enterprise information architecture that is shared between websites
- Enhanced workflow for maintenance and support
- Improved accessibility throughout the website.

Drupal 9 Initiative Roadmap

Minimum Viable Product
(5 months)
January '21 - May '21

MVP (Pilot) Implementation
(10 Months)
June '21 - March '22

Statewide Implementation
(3 Years)
April '22 - TBD '25
