

Informational Update to ITAC

Agency Vision

Children thrive in family environments free from abuse and neglect.

Agency Mission

Successfully engage children and families to ensure safety, strengthen families, and achieve permanency.

Childs Replacement Program (Guardian)

State of Arizona – Department of Child Safety

December 16, 2020

Project Health Card

Overall Project Health is Yellow

Schedule	Yellow	<ul style="list-style-type: none">The current Schedule is Yellow. The program has approved the new go live date of 02/01/21. The program re-baselined the schedule internally in September. The schedule will go green upon ITAC approval of the new end date.
Scope	Yellow	<ul style="list-style-type: none">V1.0 MVP functionality is still planned for the February release. Requirements formally identified for Release 1.1 are being de-scoped from the program and will be delivered as part of Maintenance and Operations by DCS. The scope being reduced will be presented at ITAC for approval.
Budget	Green	<ul style="list-style-type: none">The program budget is green and within variance
Risk	Yellow	<ul style="list-style-type: none">The program is still focusing on the largest risk, which is the completion of the data migration and cleansing.
Issues	Green	<ul style="list-style-type: none">Currently the program has all known issue documented and clear plans to resolve.

Project Updates

Open items from the last ITAC meeting:

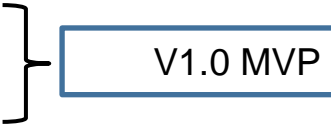

- No open items from the last ITAC meeting

Changes since the last update:

- Dry Run #1 for Data Migration Source to CE 100% complete
- Dry Run #2 scheduled for Mid December
- Business Process Validation continues
- Document Migration Dry Run underway
- All Reports Design is complete
- Business and Technical Cutover underway
- 121 of 148 business validations complete
- Data Migration and Replication 95% complete
- Data Cleansing 93% complete
- Training 54% complete
- On track for reports completion for Go-Live

Change Request

Background:

- Guardian requirements are prioritized as following
 - 1 – Required for CHILDS decommissioning
 - 2 – Required to be CCWIS Compliant
 - 3 – Needs with no workaround
 - 4 – Requests and enhancements which have work around (V1.1)
- 
- A diagram consisting of a right-facing curly bracket that groups the first three items of the list (1, 2, and 3). A horizontal line extends from the center of the bracket to the left side of a rectangular box. Inside the box, the text 'V1.0 MVP' is written in a black, sans-serif font.

Issues:

- Data migration and validation had challenges to move from our source system to Guardian which required additional time and effort
- COVID-19 began impacting the program in person training plan and had to be adjusted

Change Request

Request # 1 – End date Change from 12/31/20 – 06/31/21

- The new end date will allow for the new go live date of Q1 2021, the post go-live period, and planned decommissioning of CHILDS

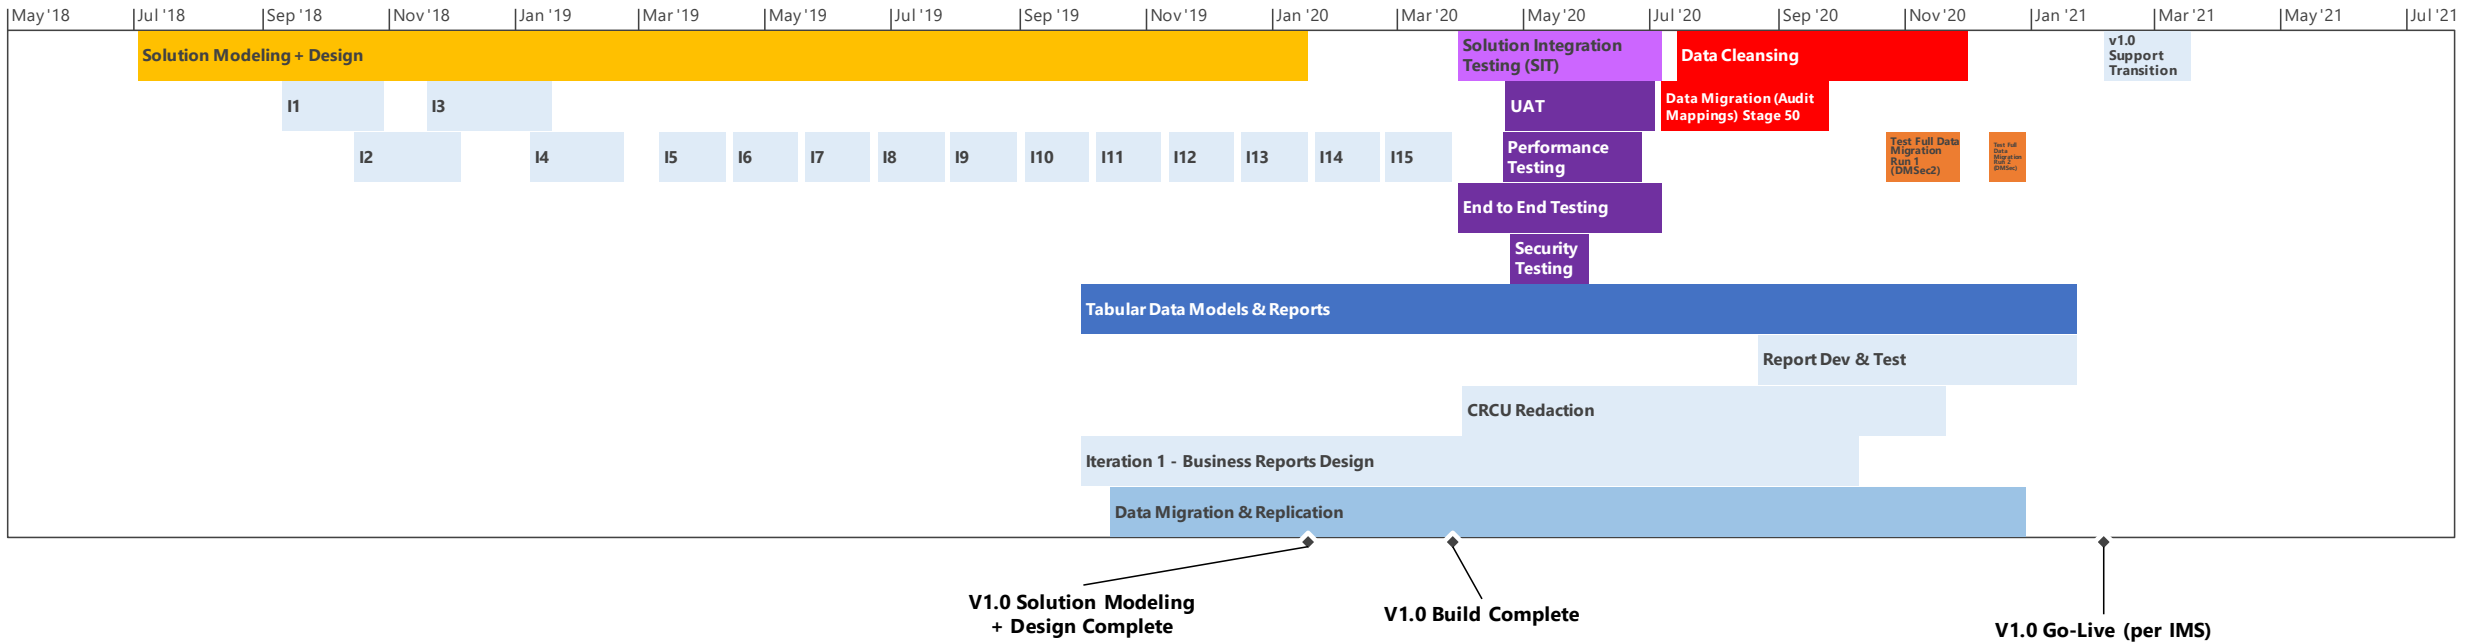

Request # 2 - De-Scoping V1.1 (Priority 4 items)

- De-scoping due to the schedule delay caused by data migration issues
- To maintain the programs fixed price, the costs of the delay are contained by descoping the requirements
- Requirements are Priority 4 which means
 - Current work arounds exist
 - Business process has been updated and the requirement is no longer needed
 - Backlogged with no future iteration scheduled
 - Dependent on future federal changes which are not defined and are backlogged accordingly

Post Go-Live

- Program will support Post Go-Live changes
- After support period, all remaining backlogged requirements will transition to maintenance and operations

Variance (%)	71%	44%	-22%	3%	12%							

Notes:
 November Variance is due to invoice timing
 Cost re-baseline completed at end of September

APPENDIX

Program History

- The current DCS CHILDS application is under Federal Rules and Regulations called SACWIS (Statewide Automated Child Welfare Information System)
- In 2015, new rules and regulations, called CCWIS (Comprehensive Child Welfare Information System), were introduced. DCS is aiming to be compliant with these regulations with Guardian:
- CCWIS benefits over the current DCS SACWIS system include:
 - Accommodates changes in practice & technology
 - Provides flexibility to “right-size” systems
 - Promotes program and system inter-operability
 - Requires data quality processes
 - Reduces costs for development and maintenance
- With a CCWIS compliant system, the federal government provides funds to assist the State of Arizona with development and implementation. It also grants additional funds to help maintain and support Guardian, as long as the system supports social workers' automation needs to organize and record quality case information about the children and families receiving child welfare services in Arizona.

Program History

- CHILDS (Children's Information Library and Data Source) was implemented in 1997 as an efficient, effective and economical method to exchange child welfare information between various State and Federal Systems
- The mainframe system has since become large, complex and inefficient with some of the common complaints being:
 - Not user-friendly
 - Limited reporting
 - Lack of a mobile platform
 - Deficient searching and matching functionality
 - Poor data quality: lack of data integrity, known duplications and data errors
 - Lack of collaboration with other agencies and system interfaces
 - Incomplete service and provider management

Program Future State

Program Future State

The Guardian Program is a child-centered, user-friendly technological solution which provides quality data and improved processes to support all DCS work for the safety of Arizona Children. Some of the goals include:

Data Quality: Increased data collection and quality

Modular Design: More flexible and adaptive to allow for future changes

Cost Reduction: Easier system development and maintenance

Follows IT Standard: Promotes efficient, economical, and effective development

Increased Collaboration: Data exchanges with external systems

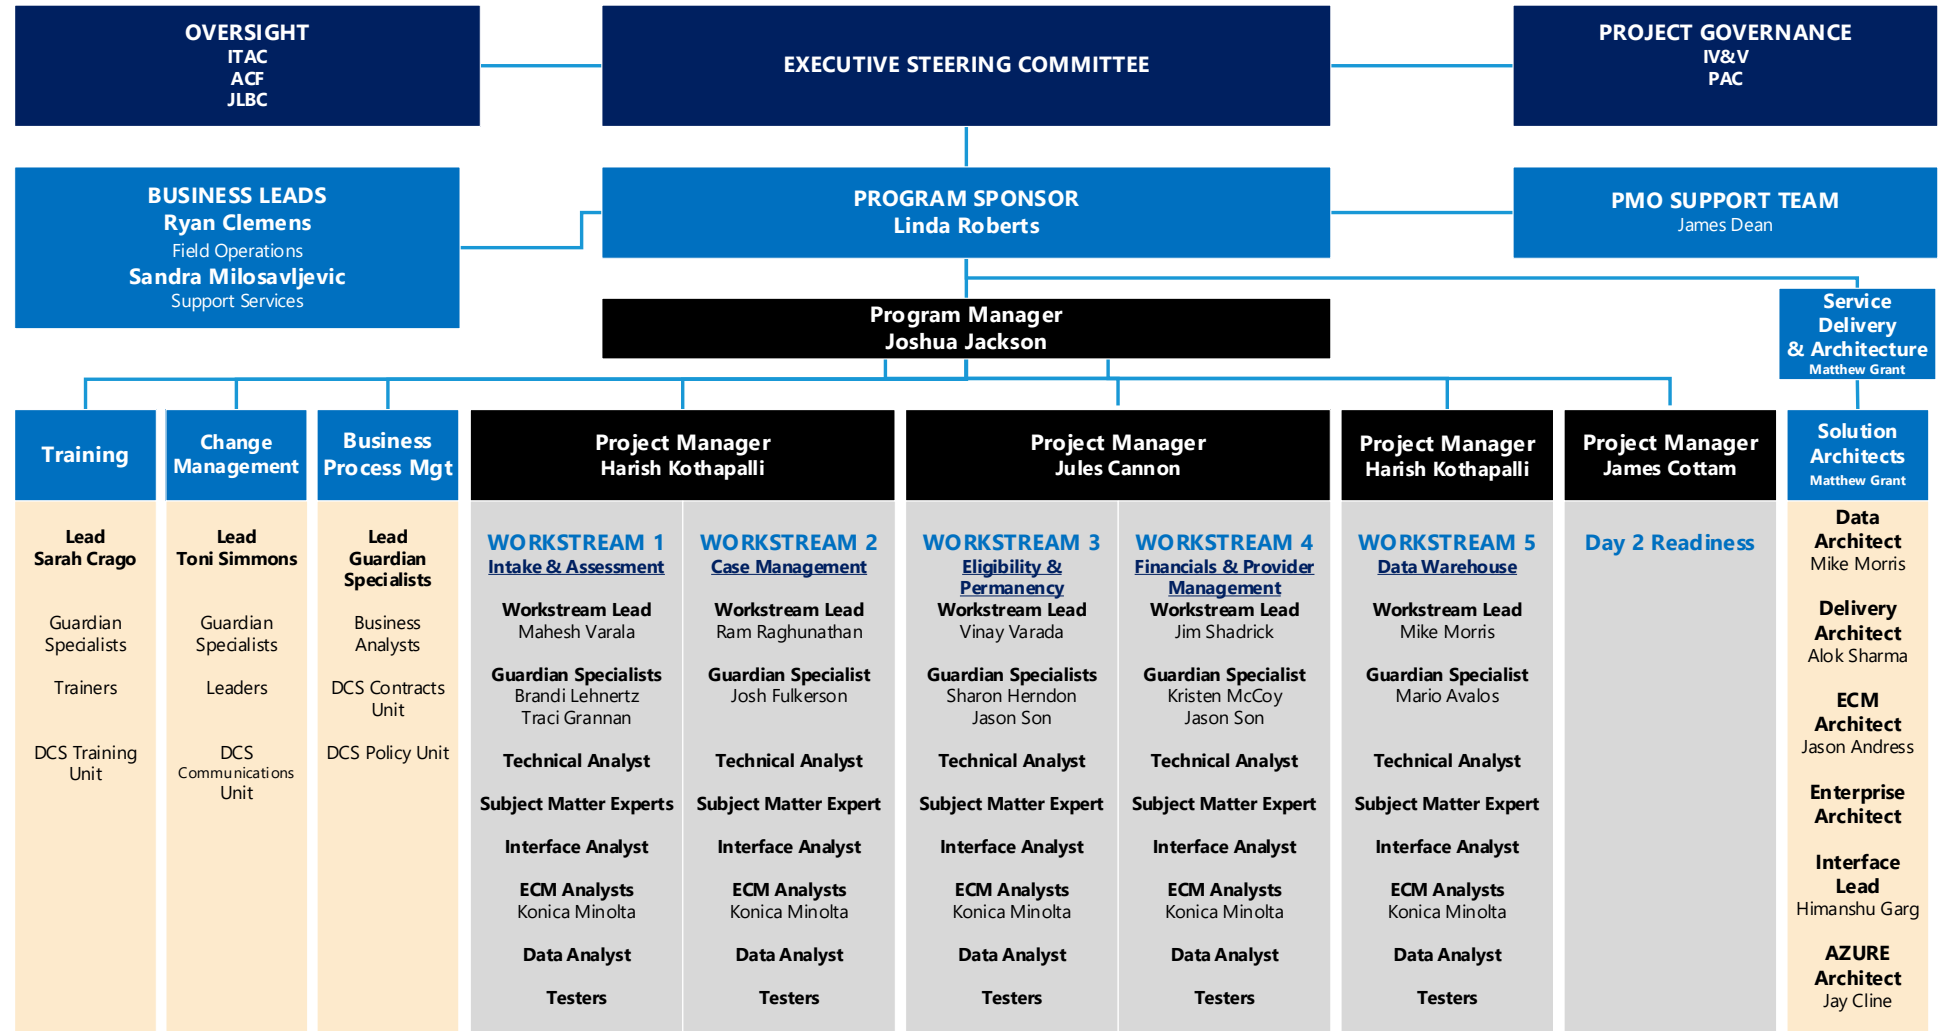

Shareable: Capable of being shared and reused by other states, tribes, and agencies
