Program overview

- 1. Arizona Inmate Management System Replacement (AIMS2) is an **allencompassing offender management system** that replaces a 1986 mainframe program. The new AIMS2 is a modern, relational database, customized-for-ADC system.
- 2. Originally awarded as a fixed-fee proposal from B&D in 2014, the program's **duration and cost have significantly increased** as the understood gap between state requirements and off-the-shelf system capabilities has grown.
- 3. The **system scope is large**, covering all aspects of inmate management: including sentence calculation and 39 other aspects of inmate management (defined as "modules"). The system includes 30 interfaces, 149 reports, and data migration of over 300,000 inmate records.

Full AIMS2 Timeline Overview

Program Snapshot

Current Focus

- Development nearing full completion
 - 60 reports, a sentence calculation change request, and final system interface being completed
- Prepare for training and end-to-end testing
- Systematically complete testing of interfaces and delivered reports; close remaining (79) high bugs

Project Trajectory

End-to-End Testing

• "Go" decision reached

Perryville Pilot "Go/No-Go" decision scheduled by Oct 21

State-wide Go Live

 "Go/No-Go" decision scheduled by Nov 15

- ✓ System functionality has reached the level needed to support realistic scenario testing
- ✓ Final change request nearing completion
- Required 18 reports on track for delivery in time
- ✓ Schedule ahead is aggressive, but feasible

- Will system functionality and Ops be ready real-life comparison to AIMS1?
- Are users trained and ready and is support in place for pilot?
- Are all Change Requests fully operational?
- □ Are the required reports and interfaces ready?
- Are any remaining risks acceptably mitigated?

- Are users trained and ready to rely on the new system?
- □ Do show-stopping bugs remain?
- □ Is data migration ready for final migration?
- □ Is the support for state-wide usage in place?

Factors to Consider Regarding Phase 2

Phase 2 Criteria

Zero critical or high severity bugs

85% of module scripts passing

Realistic E2E Criteria

Zero critical bugs, evaluate each high bug

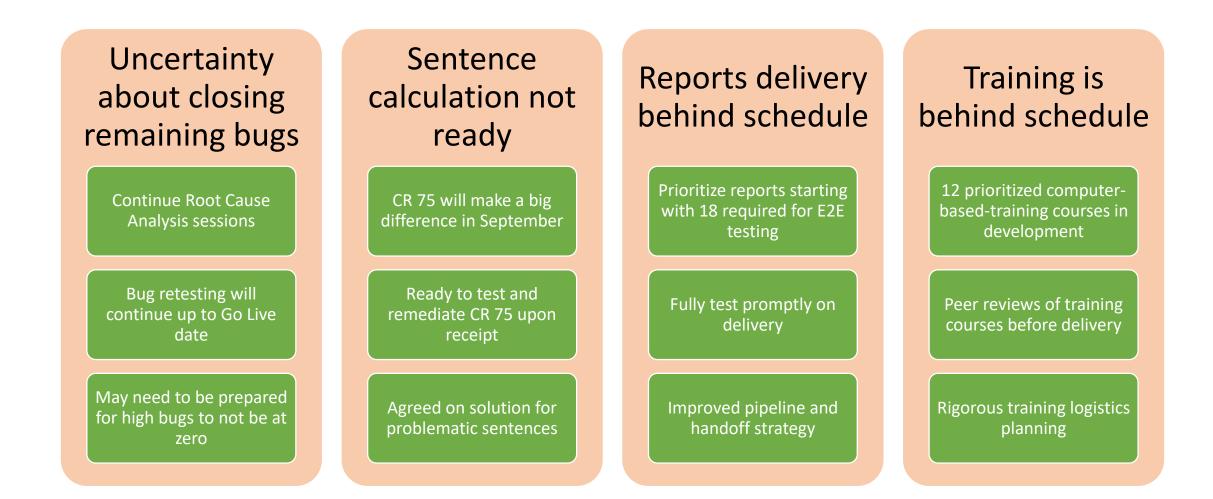

Modules with <85% scripts passing, reevaluate Reason for Change

Not all high bugs prevent E2E testing

Retesting all scripts yields diminishing value

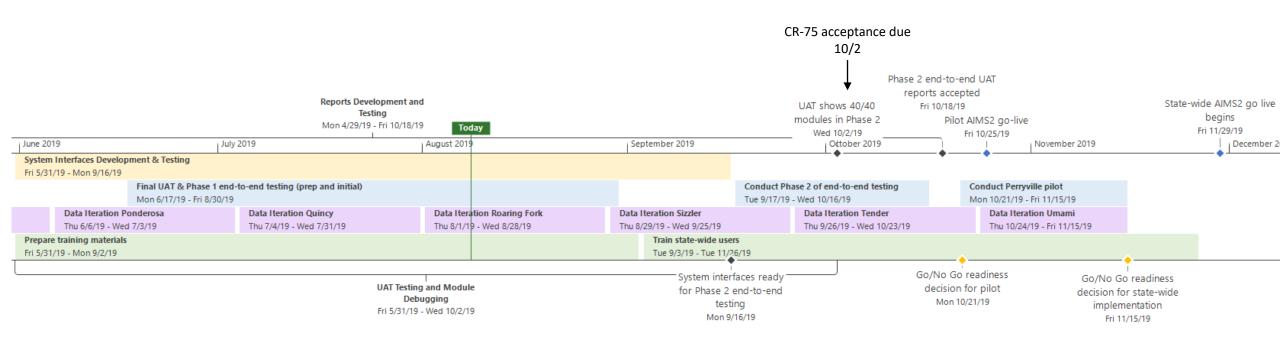

Concerns & Countermeasures

AIMS2 Monthly Report

AIMS2 - Reports Completed

Work stream 3: Change requests

Key Wins Since July 1

Advanced to Phase 2			Successful resolution		
 Assessments 	Nine change requests	Google Meets	of two critical bugs		
• DI-57	accepted	deployed to ADC team,	each within five days of		
• Property	accepted	including testers	discovery		
Protective Custody			uiscovery		

Training processes mobilized, classes starting Improved management of risks, actions, issues, decisions, and successes Went from 40 reports received, 7 accepted to 89 reports received, 27 accepted
